

Learning is Liberated!!

BUNDLE

We just deployed a nifty sales tool that allows you to combine a series of modules and courses.

It's called the Bundle, and it allows you to package modules and courses, which you can price and publish in the Marketplace.

You can use the Bundle

- as a sales promotional tool where you can price your training at a special rate
- as a means to attract customers who would like the convenience of purchasing a set of your modules and courses without buying them individually

You can find the Bundle link inside the Actions box on the right hand side of your LMS interface.

- Click on the Bundle link
- Create a Title
- And press the Create Bundle button

Customize your new Bundle by adding

- a coverpage
- a description
- specific keywords so your bundle can be found easily,
- CEU credits if applicable,
- Language,
- Private comments,
- and Table of Contents.

Click Save

Add your modules and courses by clicking the Add Modules link

Once done, the Bundle is ready to be Published in the Marketplace
